

ISO Central Secretariat editorial comments*
Commentaires rédactionnels du Secrétariat central de l'ISO**

ISO/DIS 13710

ISO/TC 115/SC

* To be taken into consideration when preparing the revised draft.

** À prendre en considération lors de la préparation du projet révisé.

Although this text is acceptable for circulation as a second DIS, please ensure that the following changes are made when preparing the revised FDIS text.

1) As stated in the evaluation of the first DIS, only include in clause 2 those standards that are referenced in a normative way.

Delete ISO ..., ISO/R 773 and other withdrawn standards. These are, fortunately, not cited anywhere in the text. Check all the others to see if and how they are cited.

Give the title of ISO 13691.

Delete "Standards of the Tubular Exchanger Manufacturers Association or give specific documents.

IEC standards now are numbered 60000.

2) Avoid hanging paragraphs, e.g. subclause 6.3 and many others throughout the text.

3) It is not acceptable to have two orders of untitled subclauses. For example: in 6.8.1, put a), b) c), d) instead of 6.8.1.1 to 6.8.1.4. See also 6.11.4.4.

4) Do not put recommendations in the form of Notes. All text containing "should" must be put as full text.

5) What do the references ISO 683/XIII-4 mean in Table A.1?

6) Figure D.1 should be Table D.1, and Table D.2 comes after.

Thank you for your attention to these points.
