

ISO Central Secretariat editorial comments*
Commentaires rédactionnels du Secrétariat central de l'ISO**

ISO/DIS 10439.2

ISO/TC 118/WG 6

* To be taken into consideration when preparing the revised draft.

** À prendre en considération lors de la préparation du projet révisé.

In accepting this document for circulation for the two-month second DIS vote, we would nevertheless like to point out several important points that you will need to take into account when preparing your text for submission to ISO/CS for preparation for the FDIS vote:

1) If you need to have margin bullets in this document, you **MUST** coordinate with TC 67 to obtain a text prepared on an "adjusted" ISO template incorporating the bullet functionality supplied to TC 67 by the ISO Central Secretariat in December 1999.

2) Annex A typical data sheets: Please **NUMBER** the data sheets (they seem to run into each other as presented now) and **DO NOT REPEAT** those data sheets which contain no units, as there is no need for a different one for US Customary Units.

3) When submitting final drawings, please number figure elements and use a Key to explain the numbers (see ISO/IEC Directives Part 3 for an example) to maintain the drawings language-independent.

Failure to take these points into account for the FDIS text may result in refusal of the document by ISO/CS. Thanks you in advance for your kind cooperation.
