

ISO Central Secretariat editorial comments*
Commentaires rédactionnels du Secrétariat central de l'ISO**

ISO/DIS 10440-2

ISO/TC 118

* To be taken into consideration when preparing the revised draft.

** À prendre en considération lors de la préparation du projet révisé.

This document has unfortunately been refused for preparation for the FDIS vote, for the following editorial reasons:

1) The ISO template including the function for incorporating bullets, which was provided to TC 67/SC 6, has not been used. Please resubmit this document on the "bullets" template, taking care to use the correct Foreword, the correct fixed text for the Normative references clause and the Terms and definitions clause, and to apply the styles correctly. Note that there is now a fixed wording for explanation of the bullets. These are all incorrect in the present text. Please coordinate with TC 67/SC 6 for use of the correct template.

In contradiction to the statement in your Introduction, unless this is a "Fast-track" document, the content must conform to Part 3 of the ISO/IEC Directives.

2) The last sentence of the Introduction must be deleted, as there are no annexes to this document.

3) Do not use the verbal auxiliary "will", which is confusing in the ISO context. Change all "will"s to either "shall" or "should", as appropriate. See e.g. 5.3.1.2.7 and 5.5.4.2.

4) Many citations of API, ASTM, ASME are given in the text in an informative manner, yet are incorrectly listed in the Normative references clause. Please create a Bibliography for these references. Where an ISO "equivalent" exists, the ISO reference alone shall be cited, though a list of corresponding ASTM etc. refs. may be given in an annex.

5) ISO uses the decimal comma, not the decimal point. Please correct throughout the document.

6) Please follow the rules in annex C of Part 3 of the ISO/IEC Directives for content and presentation of definitions in clause 3.

7) Neither requirements nor recommendations are permitted in Notes. Please transform Notes containing such provisions into full text.

8) A normative reference as in 6.3.2.4 to "ASME Code" is meaningless. Please cite a specific document, otherwise the reader does not know which document to use.

9) Normative references:

ISO 1328:1975 was withdrawn in 1995 and split into parts. To which part are your referring? Please correct document accordingly.

The revision to ISO 262:1991 was published in 1998.

ISO 3506:1979 was withdrawn in 1997 and split into parts. To which part are you referring? Please correct document accordingly.

ISO 3945 was withdrawn in in 1995 and not replaced. Please delete all reference to this document or substitute another appropriate document in its place.

ISO 9392 deals with agglomerated cork discs-- Please check your numbers and correct.

The year of publication of ISO 10441 is 1999, not 1996.

Please correct the errors listed above and resubmit the document using the "bullets" template. We look forward to receiving the new text in due course. Thank you for your kind cooperation.
